

The plot shows a single vertical line of data points at time 1800. The y-axis represents the value of the objective function, ranging from -150 to -60. The x-axis represents time in wall clock seconds, ranging from 1780 to 1820. The data points are clustered around time 1800, showing a sharp increase in the objective function value from approximately -142 to -68.
