

The plot displays the value of the objective function on the y-axis (ranging from 80,000 to 300,000) against time in wall clock seconds on the x-axis (ranging from 857.98 to 857.99). The function value starts at approximately 285,000 at 857.98 seconds, drops sharply to about 95,000 by 857.981 seconds, and then remains constant at 95,000 for the rest of the time interval.
