

The plot shows the value of the objective function on the y-axis (ranging from 5000 to 10000) against time in wall clock seconds on the x-axis (ranging from 1211.13 to 1211.14). The data points are connected by a purple line. The value starts at approximately 9700 at 1211.1300 seconds and drops sharply to about 5200 by 1211.1301 seconds, remaining constant thereafter.

time (wall clock seconds)	value of the objective function
1211.1300	9700
1211.1301	5200
1211.1400	5200
